# THE SHEEP HERDING GAME: CAN YOU BEAT THE ALGORITHM?

Main rules

► The dog should drive sheep to the target (red).

► You can steer the dog with the arrow keys.

► The sheep are afraid of the dog and of the fences.

► The farther the sheep are from the target, the faster the cost increases.

► The level is completed when all sheep stand still near the target.

**Try it now for yourself in Room 01.251
and see if you can beat the algorithm!**
